Always Go Prepared!

When traveling into the wilderness, you must go prepared. Trips normally last Your Guide will do his best to accommodate you with the things you may or may not have that are necessary for a good trip such as fishing gear or personal items. However, please don't wait until you arrive to tell us about them! We always do our best to make sure everyone is properly outfitted, but this is only possible if we know ahead of time. We care about your return business, so help us make your trip the best it can possibly be.

One Final Note:

Please be flexible with your expectations. Nature is wild and unpredictable and some days our best guides bag of tricks don't work. There are always fish around, but we can't always make them bite!
